

Hydraulic Cable Cutters

Cable Cutters N-22

Designed specifically for cutting cables up to 85mm in diameter. Cables can be bundled, entangled, several pieces at a time.

Faster, safer and more economical work than cutting cables using handheld or angle grinders.

Technical data:

- Engine power: 1.5kW / 2HP
- Voltage: 220 - 240 / 400V
- Hydraulic pump pressure: 240bar / 24MPa
- Length of the hydraulic hose: 10m
- Maximum diameter of the cut cable: Ø 85mm
- Dimensions of the trolley
(length x width x height): 400x300x620mm
- Weight of the trolley: 80kg
- The length of the shears
(including the hydraulic cylinder): 320mm
- Scissors weight (including hydraulic cylinder): 6.5kg

Build:

The MACHTEK N-22 mobile hydraulic cable shears are constructed from an electrically powered hydraulic pump placed on a trolley, a hydraulic hose with a length of 10m and adapted to cut shear cables with a hydraulic cylinder.

Advantages:

- fast, effective work
- saving money
- no dust, smoke and noise
- long life of the shears
- ease of use
