

## Hydraulic Cable Cutters

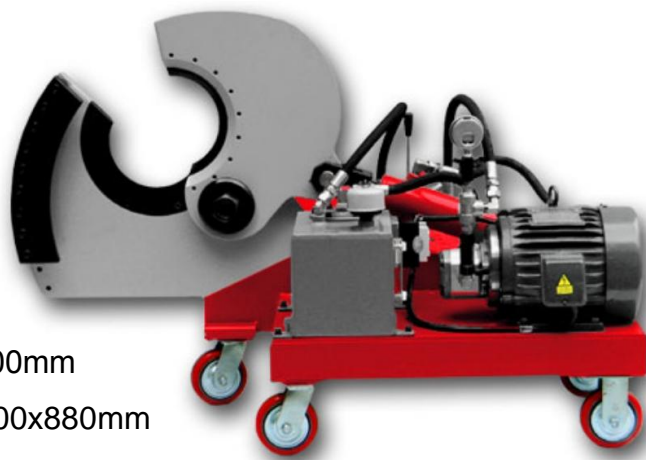

### Mobile Cable Cutters N-44

**Exceptional shears for cutting cables with diameters up to 200mm.  
Ideal for thick underground power cables and cables in non-ferrous metal sheaths.**

**Faster, safer and more economical work  
than cutting cables using handheld or angle grinders.**

#### Technical data:

- Engine power: 5 - 7.5HP
- Voltage: 220 - 240 / 400V
- Hydraulic pump pressure: 240bar / 24MPa
- The maximum diameter of the cut cable: Ø 200mm
- Dimensions (length x width x height): 1320x500x880mm
- Weight: 210kg

#### Build:

The mobile hydraulic shears for thick cables and scrap MACHTEK N-44 were placed on a platform equipped with wheels. They consist of an electric motor, a hydraulic pump, a hydraulic cylinder and steel shears (gray color). The cutting elements of the shears (black) are interchangeable (fixed with screws).

#### Advantages:

- **fast, effective work**
- **saving money**
- **no dust, smoke and noise**
- **long life of the shears**
- **ease of use**
- **more applications**
- **mobility**
