Forced guidance makes your work easier and faster

RECO-40 delivers:

- high reliability at low cost,
- perfect solution if you do not want to invest in electric strippers
- flexibility - works with more than a half of cables,
- may strip cables as thin as 1mm
- precise and steady work - cables are force guided and cut from one side,
- user-friendly operation:
- automatic bearing maintenance,
- fast adjustment of roll pressure in a continuous way,
- you can replace single feeding rolls or blade rolls,
- safety confirmed with **CE** certification.

Technical Features:

- a cable stripping machine with 9 tracks ensures high efficiency,
- 9 disc blade made of hardened tool steel on the top roll
- two top switches ensure proper pressure,
- durable feeding rolls made of steel,
- after being cut cables are crushed for better stripping

Keep calm
